# Bringing back history

The Painted Memories mural collection brings beautiful Dutch landscape, flower and portrait paintings back to life, giving you the opportunity to add any of these pieces of history to your wall. Each mural that is presented in this book has an added textile effect to give it just a bit more realisme and charm.

In this book there are 33 beautiful and uniquely satisfying wallpaper murals to choose from, which are also all customizable with your own sizes.

## Do you prefer your paintings in a frame?

At the back of this book there is also an option to choose any of the references that we have available and frame them like a actual painting. Just choose the reference you like, including the provided size, background and frame, and we can print the paintings as wallpaper, but with a frame.

*For more information, page to the back of this book* ►

# Mural specifications

- Non-woven backing
- All our wallpapers are certified with the BS1, d0 (European) fire certification
- Washable surface
- Excellent image quality and light fastness
- 100% non-pvc substrate
- No minimum order required
- Extra varnishing for greater durability
- Dimensionally stable without stretching or shrinking.
- Can be removed in a dry condition for redecoration, provided the appropriate paste has been used
- 50 cm wide panel width

## Toner

The wallpapers are digitally printed with QA-P dry toner for excellent image quality. QA-P toners also contain no hazardous chemicals, so they are compliant with the US and EU black lists, US-C-070928PROPIC-65 and UE Standard EN71-3 (heavy metals). Throughout the manufacturing process, serious consideration is given to environmental aspects: Equally important, the wallpaper are recyclable and biodegradable.

## Fire-certification:

All the wallpaper are certified with the Bs1, d0 (European) fire-certification.

Non-woven matt wallpaper (155 grams/m2) is a dimensionally stable product that is most commonly used for the commercial digital wallpaper market. The base is made out of a fabric-like material made from long fibers, bonded together by a heat treatment. This process creates a mesh that bonds the wood fibers tightly together making the product extremely durable. In comparison with the non-woven embossed wallpaper, which is similar in appearance, the non-woven matt version is made without textured embossing and an additional protective varnish (heavy metal free) is added for extra washability and scrub resistance.
